EXPERIENCE

Freelance, CapeTown — Intermediate Software Developer (FullStack Software Developer) May 2021 - PRESENT

Improved sales of my client by creating and publishing his website. Allows customers to share links of his website to many customers who are contacting him. Planned meetings with clients to gather their project requirements, updated and created websites for clients based on gathered specifications. Delivered projects on time and within budget to meet specifications. Applied skills and knowledge to accomplish set performance goals.

SweepSouth, CapeTown — Junior Software Developer Nov 2018 - April 2021

Improved worker awareness of their strengths and weaknesses by adding positive and negative review features on application. Simplified the selection of a worker by clients in terms of performance by adding a performance bar. Simplified selection of extra jobs by workers by showing work areas and their codes on worker application. Allowed workers to add beneficiary details by adding a web page with a form to complete beneficiary details. Simplified application process by adding a date picker on the date of birth field.
